Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 67 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wycherley.

Regarding claim 67, Wycherley discloses the mobile phone of claim 66, wherein the audio data file facilitates modification of audio of the mobile phone to audio that is complementary to the visually perceivable attributes of the non-functional theme provided by the non-functional decorations of the exterior surface of the interchangeable cover. (0017-0030)

Wycherley does not expressly disclose the changing of a voice greeting. Examiner takes official notice that is notoriously well known in the art that voice greetings are a type of audio used in a portable phone that may be changed. It would therefore have been obvious to one of ordinary skill in the art at the time of the invention to change a voice greeting when a cover is changed to reflect the other changes in visual and aural attributes changed by the cover.
